Mortar

CHIN HIN · PROPERTY BOOKING CONVERSION · YEI 3.0

Booked Is Not Sold. Signed Is.

One shared record that shows who should act next on every booking, so staff assign dated work towards a signed Sale & Purchase Agreement.

Chin Hin Group · Preliminary Pitch · **October 2026**

Team NexTechnologies · Live Walkthrough Follows

All Data On Screen Is Simulated

THE BUSINESS · CHIN HIN GROUP PROPERTY

A Booking Is A Promise. A Signed SPA Is A Sale.

RM2.2 bn

Unbilled sales — every ringgit of it began as a booking that signed.

CHGP 2Q 2026 Results · 30 Jun 2026

6–12 weeks

A stalled booking can hold a unit off the market.

Chin Hin Challenge Brief

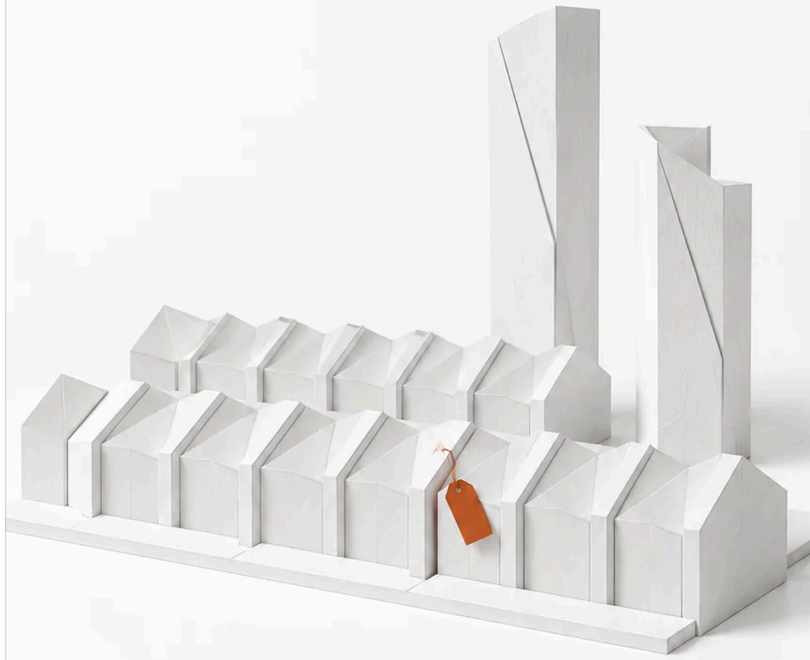

38%

Housing-loan rejections for RM500k–700k homes.

REHDA Industry Survey · 2H 2025

Today nobody can say how many live bookings will sign. **Finance plans on bookings; Sales defends them.**

THE WORKFLOW TODAY

Three Desks. One Booking. No Owner In Between.

Booked

Sales Admin

- Buyer changes their mind

→

Documents

Sales Admin · Buyer

- A payslip missing for weeks

→

Loan

Loan Admin · Bank

- Rejected, or the bank goes quiet

→

SPA Drafted

Legal Admin · Law Firm

- No signing date is set

→

SPA Signed

The Sale

- The only step that counts

WHERE STATUS LIVES

CRM · 4 of 8 | **Spreadsheets** · 2 of 8 | **WhatsApp** · 2 of 8 | **Email** · 1 of 8 | **Property Software** · 1 of 8

Practitioner Survey · n = 8

A file reads "with bank" while the real next move sits with the buyer — **and nobody is assigned to it.**

EVIDENCE, THEN ASSUMPTIONS

What We Know. What We Still Assume.

Evidence

What we can show today

7 / 8

name loan rejection or thin financing the single biggest cause

Practitioner Survey · n = 8

5 / 8

say bookings stall at bank credit assessment

Practitioner Survey · n = 8

7 / 8

name an early financing check the most helpful change

Practitioner Survey · n = 8

38%

loan rejections, RM500k–700k homes

REHDA Industry Survey · 2H 2025

Assumptions

What the pilot must prove

A1 Chin Hin's leaks follow the same order

Test · Rebuild loss reasons from closed files

A2 Follow-up lifts stalled bookings from 20% to 40% signed

Test · Assisted cohort vs ordinary follow-up

A3 Staff will paste banker messages in daily

Test · One admin, two weeks

A4 Bookings can start from a spreadsheet export

Test · First upload, week one

Eight practitioners rank the causes. **They do not measure Chin Hin — the pilot does.**

OUR SOLUTION LOGIC

Evidence In. An Owned Next Step Out.

A Message Arrives

Banker, buyer or lawyer, pasted in

→

Mortar AI Reads It

Mortar AI proposes the event, document and owner

→

A Person Confirms

Only confirmed evidence moves the case

→

Blocker → Task

A named owner and a due date

→

Forecast Updates

Expected signings, with a range

- **One Rejection Is Not The End**

  Up to three bank applications per booking, tracked apart.

- **Silence Reads As Unknown**

  Ten days with no confirmed event is never healthy.

- **Count Signings, Not Bookings**

  The forecast shows its sample size and its range.

THE AI LAYER

Meet Mortar AI. It Reads, And It Answers.

Reads

MESSAGES

Turns every message into a proposal.

BANKER · WHATSAPP

“Still need latest 3 months slip gaji ah, current one only got June.”

MORTAR AI SUGGESTS

Documents Requested · Payslip · Sales

Mortar AI Is Sure | Confirm | a person decides

- **USED FOR**
  Every buyer, banker and lawyer message, Manglish included.
- **WHY IT HELPS**
  Staff paste it; Mortar AI proposes, and staff check it before confirming.
- **WHAT SETS IT APART**
  Chatbots write freely; Mortar AI picks set answers, so it can’t invent statuses.

Answers

QUESTIONS

Answers staff in Ask Mortar AI, from their own bookings.

LOAN ADMIN · ASK MORTAR AI

“What is BK-9001 waiting on?”

MORTAR AI ANSWERS

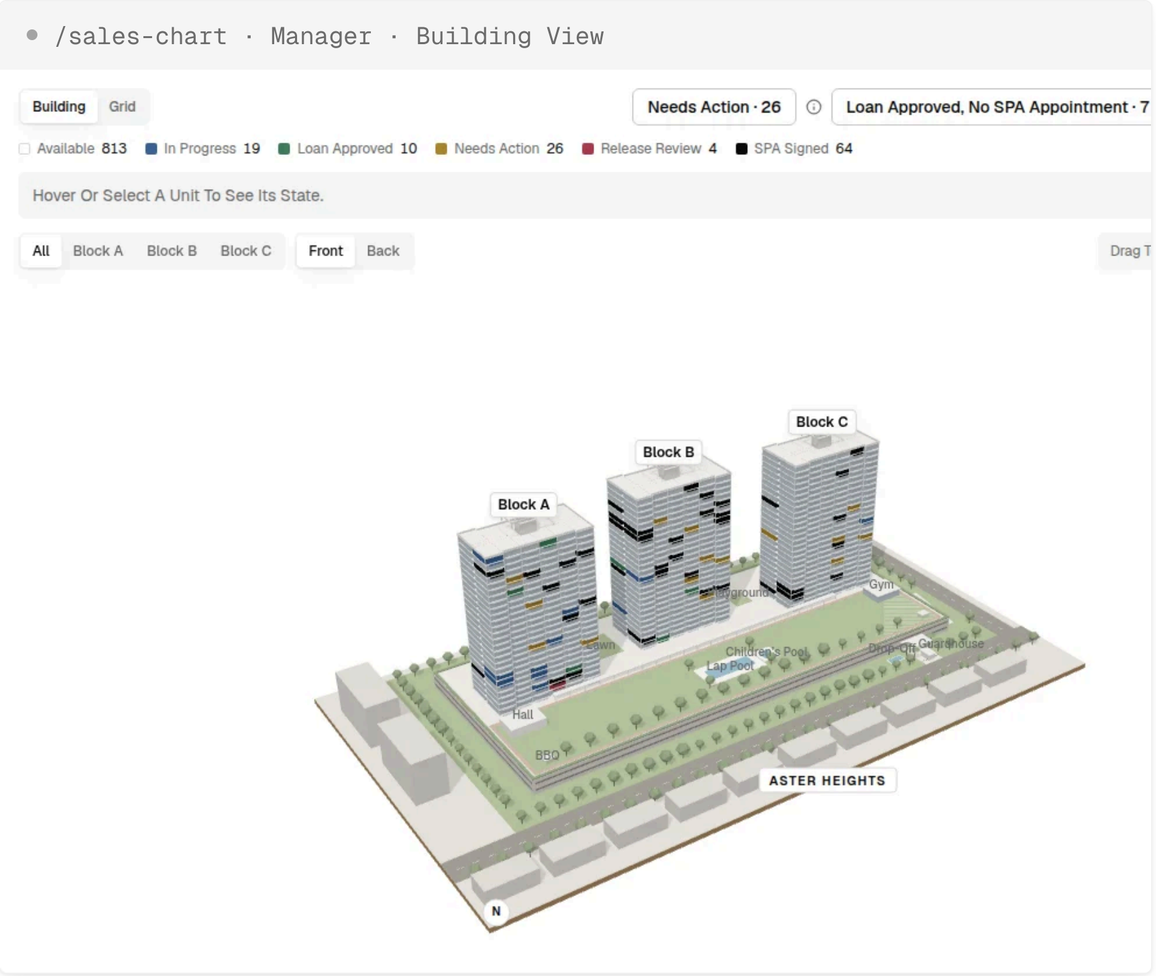

Apex Bank's loan decision. Next step: Tan Mei Ling calls the banker.

`BK-9001` cited, read-only

- **USED FOR**
  Staff questions, even about a photo of a bank letter.
- **WHY IT HELPS**
  One cited answer instead of five screens.
- **WHAT SETS IT APART**
  Unlike chatbots, Mortar AI sees only your bookings and can’t change records.

LIVE WALKTHROUGH · MORTAR-D18F.ONRENDER.COM

Watch The Work Move Between Desks.

1

MANAGER · SALES CHART

Every unit on one screen: 123 booked, 64 signed.

Causes the closing list: recorded approval, no appointment yet.

2

LOAN ADMIN · CASE PAGE · BK-9001

The banker asks for a payslip. Mortar AI proposes it; a person confirms.

Causes confirmed evidence — the case now waits on the buyer.

3

LOAN ADMIN · CASE PAGE · BK-9001

The payslip arrives and is verified.

Causes the document blocker clears. The bank still decides.

4

MANAGER · TODAY · DECISIONS FOR YOU

A case runs past its expected time.

Causes a follow-up on the owner's Today. Nothing leaves Mortar.

5

LEGAL ADMIN · SALES CHART · A-23A-02

The loan is approved, but no signing date is set.

Causes an appointment, then a recorded SPA signing.

BEFORE AND AFTER

Same Booking. A Different Monday.

Before Mortar

- **16 days old and “with bank”** — the missing payslip belongs to nobody.
- Status is rebuilt from WhatsApp threads and memory.
- Finance counts every booking at face value.

With Mortar

- **Waiting on the buyer's payslip** — owned by Tan Mei Ling in Loan Admin, with a due date.
- One case page shows who reported it, who confirmed it, and when.
- Finance reads **expected signings with a range**, not bookings.

What changes is ownership and evidence. **The bank still decides the loan.**

HOW IT GETS ADOPTED

One Project. One Admin. Twelve Weeks.

DAY ONE

Upload The Booking Sheet

Seven columns, headers matched loosely

Each Desk Opens Its Queue

Sales, Loan, Legal, Manager

Bankers And Lawyers Change Nothing

Staff paste messages in

THE PILOT

WEEKS 1-2

Baseline

Load one project; rebuild why closed files failed.

WEEKS 3-4

One Admin

The daily Today queue with one Sales Admin.

WEEKS 5-8

Live Cohort

Assisted bookings beside ordinary follow-up.

WEEKS 9-12

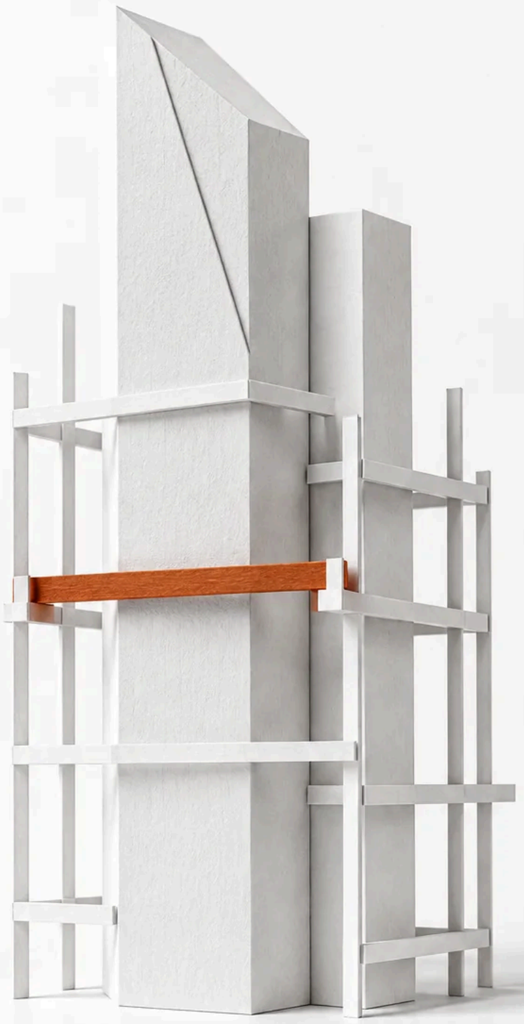

Audit

Count verified SPAs with Legal; decide.

JUDGED BY ONE NUMBER

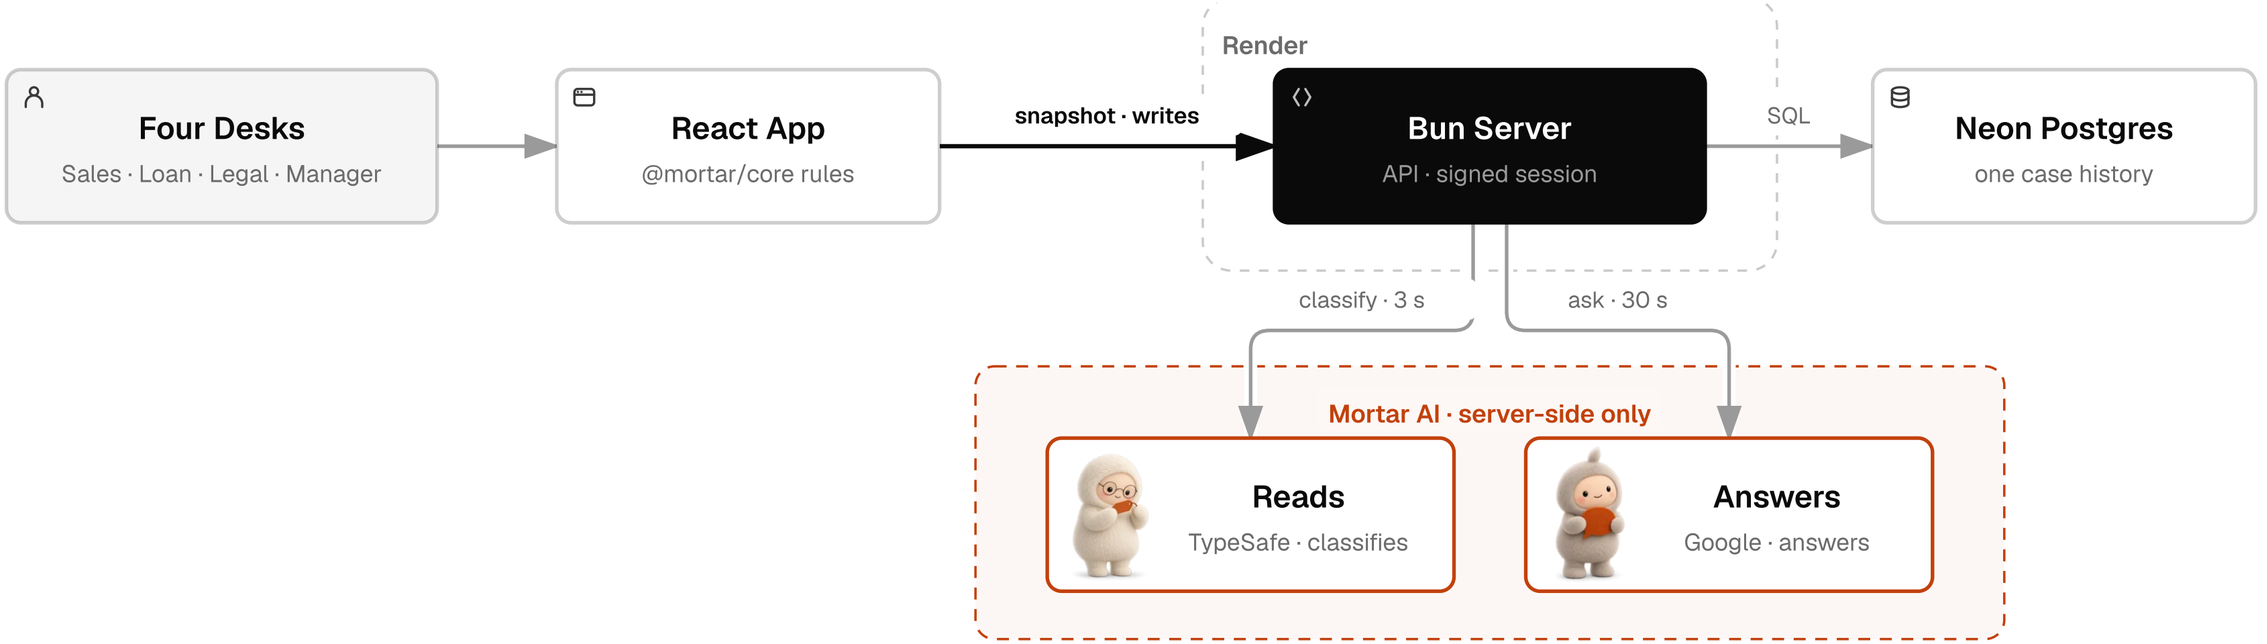

30-Day Verified SPA Rate

Bookings with a verified signed SPA within 30 days ÷ eligible bookings.

TECHNOLOGY, SECOND

Built So The Workflow Survives A Bad AI Day.

Drawn with Archify from the repository

948 tests pass · every deploy waits for CI · simulated data

If Mortar AI Is Slow Or Down

Each answer steps down; the desk keeps working

01	Live Answer	Typed, with a confidence
02	Cached Answer	Asked before, reused
03	Stale, Marked	Shown with a stale tag
04	By Hand	Staff record the update

Mortar

This Week. What We Need.

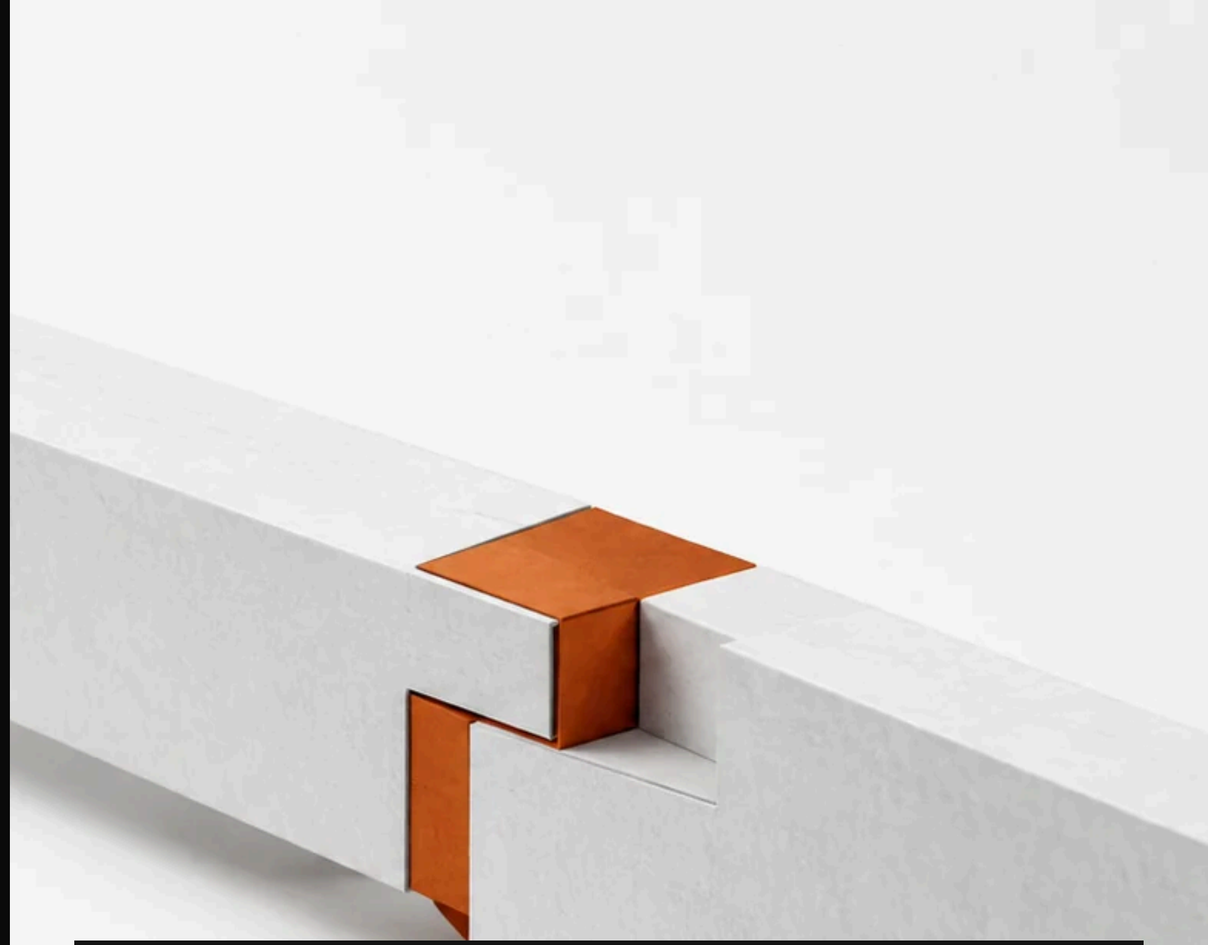

SHIPPED SINCE 29 SEP

- The Sales Chart: every unit by booking-to-SPA state, in 3D and as a grid
- The closing list: approved loans with no signing date, one click to the case
- One project layout with 3A, 13A and 23A floors; imports refuse a held unit
- Earlier: a Manager desk, scoped staff profiles and Ask Mortar AI

TO START A PILOT

> This build is for synthetic data. Real buyer data needs agreed identity, processing and retention arrangements first.

- One pilot project and the Sales Admin who would run it
- An anonymised booking export and the unit register
- Two practitioner interviews to check our leak ranking
